INTRODUCTION

Data . Insights . Growth

SaaS Customer ,Subscription , Revenue & Churn Analytics

Rekshini Y.S.

Data Analyst | B. Tech AI & Data Science

ABOUT THE PROJECT

This project focuses on analyzing customer subscription data for a SaaS business. It provides insights into customer behavior, subscription trends, revenue performance, churn patterns, support activities, and product usage. The analysis helps understand business performance and supports data-driven decision making.

KEY FEATURES

- ✓ Customer Analytics
- ✓ Subscription Analytics
- ✓ Revenue & Payment Analysis
- ✓ Churn Analysis
- ✓ Support Ticket Analysis
- ✓ Usage & Engagement Analytics

TOOL USED

Python

(Data Generation)

MySQL

(Data Storage)

Power BI

(Data Visualization)

**Turning Data
into
Actionable
Insights**

PROJECT GOAL

The goal of this project is to analyze customer, subscription, revenue, churn, support, and usage data to understand SaaS business performance and generate meaningful insights for data-driven decision making.

KEY INSIGHTS

Active customers form the largest share with a steady growth trend.

Monthly plan is the most popular subscription type.

Churn rate is 21.8%, indicating room for improvement in retention.

Login issues and billing questions are the top support tickets.
